# Black is back

Although it has never really left the scene, black is back this season having been teamed up with fresh citrus colours to create a fabulous, mouthwatering look. Whether you are looking for a casual number or something more formal, you will find the perfect style this spring.

Aztec patterns and geometric shapes look fabulous in contrasting colourways.

If you prefer a little more colour in your life, many designs sport a black border as a contrast. This is perfect for accessorising as it offers flexibility in the choice of bag or shoes that you opt for.
